

Design Evanston Tour Lakeside!

Join DE members and friends for a unique tour of the award-winning SOM master planned community at the former 500-acre U.S. Steel Southworks site. Our tour guide will be Nasutsa Mabwa, Project Manager of Development for McCaffery Interests. Boxed lunches will be provided. Car pooling to the site is encouraged.

Lakeside will be a new high-density, mixed-use South Side Chicago community of 13,500 residents. The void in Chicago's waterfront, Lakeside is the last major piece of land available for development on the city's increasingly vital and valuable lakefront.

Project Awards: 2009 • AIA • Regional and Urban Design Award; AIA - Boston Society of Architects • Citation for Excellence in Urban Design; Chicago Athenaeum • International Architecture Award. 2007 • AIA - Chicago Chapter • Sustainable Design Award: Citation of Merit.
